Research

Involved in supervision of Masters of Surgery candidates in conducting researches/ dissertation for Masters of Surgery Programme:

- a) Correlation between preoperative peak-to-peak pulsatility index of brachial artery and maturation of native brachio-cephalic fistula
- b) Endovascular aneurysm repair (EVAR): validation of the ERA model in Malaysia
- c) Infra renal Aorta morphology in abdominal aortic aneurysm in multiethnic Malaysia population
- d) Accuracy of continuous wave hand held Doppler on the assessment of varicose veins

Personal research projects

- a) Results and durability of venoplasty for central vein occlusion and stenosis
- b) Results and durability of fistuloplasty on fistula stenosis
- c) Prospective Randomized Controlled Trial Comparing the AVATAR graft with a competitor.

Special Interest

1. Aortic endografting both abdominal and thoracic
2. Endothermal ablation of varicose veins
3. Vascular access creation for haemodialysis.
4. Maintenance and Surveillance of Arteriovenous fistulae including endovascular modalities eg fistuloplasty and central venoplasty
5. Endovascular Management of Critical limb Ischaemia
6. Diabetic foot ulcers and limb salvage procedures
