Adisaputra Ramadhinara

Wound specialist physician
Greater Jakarta Area, Indonesia

Summary

I'm a medical doctor graduated from the Faculty of Medicine, University of Indonesia, with a post graduate degree from Cardiff University in wound healing and tissue repair. My interest is in wound care management, as well as the science in wound healing and tissue repair.

Experience

RS Pantai Indah Kapuk
Wound specialist physician
January 2016 - Present
Pantai Indah Kapuk, North Jakarta, Indonesia

The Specialist Wound Center
Wound Specialist
November 2013 - September 2017 (3 years 11 months)
I do wound care management, as well as managing the Wound Center in daily business

Government Primary Health Care Service
Physician
2011 - 2012 (2 years)
Flores, East Nusa Tenggara
I served in the remote area of Eastern Nusa Tenggara Province, Indonesia, as part of the Government Mandatory Program for primary care physician. Besides managing wound, I also worked as a primary care physician for the local people.

Royal Taruma Hospital
Intensive Care Physician
2010 - 2011 (2 years)
West Jakarta, Indonesia

I was a member of the team in Intensive Care Unit. I routinely performed airway management procedure such as intubation, and also semi-invasive

procedure such as the placement of central venous catheter. Apart of it, I also took care of chronic wounds in critical care patients, from performing the wound care up to the nutrition management for critical ill patients.

SS Diabetes Care

Wound Physician

January 2009 - January 2010 (1 year 1 month)

IKPN, Bintaro

I managed patients with Type 2 Diabetes, planning a comprehensive approach starting from life style changing, diet and glycemc control. I also performed wound care management especially for diabetic ulcers.
