INNOVATIONS & RESEARCH ON HAEMODIALYSIS VASCULAR ACCESS CONSTRUCTION AND REVISION

- 2002 Multiple Segment Flow from side to side anastomosis in vascular access
Allowing fistula flow into multiple vein segments to maximize puncture site availability in haemodialysis vascular access.
- 2003 Valvulotomy & the induction of forearm reversed flow loops
Valvulotomy by using probe passed through venotomy to mechanically disrupt forearm vein valves, so that forearm veins may be supplied retrogradely from cubital fossa fistula
- 2004 Lazy-S-Incision & Flaps (with medial/lateral flaps for cubital fossa haemodialysis vascular access
To provide optimal exposure for cubital fossa fistula construction
- 2006 “Lateral” Cephalic Vein Use
Upper arm “Lateral” cephalic vein-to-brachial artery revision fistula construction after failure of cubital fossa brachiocephalic fistula failure
- 2006 Trapdoor Flap Exposure Cubital Fossa Reexploration
for cubital fossa exploration and reconstruction of revision upper arm BCF after cubital fossa brachiocephalic fistula failure.
- 2008 Trapdoor Flap Exposure for Repair of cubital fossa aneurysm
for exploration and repair of vascular access associated aneurysms
- 2009 Fascial Band Anterolateralisation
of superficialised deep veins in haemodialysis vascular access, to retain the lateral position of the superficialised vein for more consistent haemodialysis puncture.
- 2009 Hydrostatic dilation to augment vein diameter prior to construction of haemodialysis vascular access fistulae.
- 2011 Mid upper arm revision brachiobasilic fistula with reverse flow after failure of standard cubital fossa BBF with vein superficialisation

RESEARCH SUPERVISION:

1. B Med Sciences (University Putra Malaysia), Third Year Student Projects and Dissertation

- 1998 Profile of patients with diabetic foot complications
- Hitendra K. Doshi.
- 1999 Markers of macrovascular disease in patients with diabetic foot complications
- Khor Cheng Hoon
- 1999 Impaired olfactory nerve acuity in patients with diabetic foot complications
- Md Effendi B. Ahmad.
- 2000 Are domestic and socioeconomic factors useful in the evaluation of patients presenting with right iliac fossa pain
- Vanita Tawamany
- 2000 Adverse clinical indicators in non-variceal upper gastrointestinal bleeding
- Ravindran Krishnasamy

2. M.D. (University Putra Malaysia) Final Year Study Module (Elective) Research Projects

- 1999 Surface anatomy of the deep inguinal ring: inconsistency in the surgical literature.
- Pang Cheng Kar
- 2000 Hyponatraemia in the surgical patient
- Lim Chen Sern

3. Master of Surgery Dissertations - National University of Malaysia

- 2006 Is Valvulotomy induced reversed flow useful in Haemodialysis Vascular Access
- Lam Hong Yong.
- 2007 What is the role of the Basilic Vein in Haemodialysis Vascular Access
- Khoo Say Chuan.
- 2008 Is the side to side anastomosis induced Multiple Flow Arteriovenous fistula efficacious in Haemodialysis Vascular Access.
- Yong Ngai Yin.
- 2010 “Lateral Cephalic “ Vein to Brachial Artery Fistula Construction for prolongation of Autogenous Veins use, after conventional Brachiocephalic Fistula failure.
- Heah Hsin Tak

4. B Sc Med – National University of Ireland

- Use of the Lazy-S-Incision and Flap in Haemodialysis Vascular Access Construction.
- Hoo Chai Zhen

TEACHING EXPERIENCE :

3. External Examiner

2001 Universiti Putra Malaysia Final Surgery (Clinical)

2002 Universiti Putra Malaysia Final Surgery Supplementary Exams (Principal External Examiner)

2003 Universiti Putra Malaysia Final Surgery (Clinical)

2004 Universiti Putra Malaysia Final Surgery (Clinical)

2008 Universiti Putra Malaysia Final Year Professional MD Exam (Clinical)
